### **REASONS FOR ALLOWANCE**

1. Claims 51-61 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 51 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "at least one aspherical surface effective to reduce a change in optical performance of said optical system due to deformation of said optical element as said optical element is provided in said optical system" as set forth in the claimed combination.

The prior art of record, Tsuji et al and Lisson et al teach an optical system for forming an image of a pattern formed on a reticle, upon an object to be exposed with the optical system comprising an optical element and an optical member wherein the optical element and the optical member are disposed between the reticle and the object to be exposed. However, the prior art does not teach that the optical element is deformed by the weight thereof, nor does it teach an aspherical surface effective to reduce a change in optical performance of said optical system due to deformation of the optical element and there is no motivation or teaching to modify this difference as derived.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
